

Florida Conservation Coalition

Dear FCC Members,

The terrible environmental train bills, [SB 1684](#) and [HB 999](#), are barreling towards final votes on the Senate and House Floor. These Bills seek to change over 25 environmental laws and regulations affecting our water, air quality, protection of state submerged land, environmental resource permitting (including wetlands), development permitting and more.

Yesterday, SB 1684 passed through the Senate Agriculture Committee 4-2, with Senator Bullard and Senator Grimsley voting against it. These Senators, from different parties, understand the importance of our natural resources; they heard your calls, read your emails, and have taken a stand to protect Florida's environment.

This is encouraging, but the hard work has just begun...

The next opportunity to derail these bills is in the Senate General Government Appropriations Subcommittee. **We need every single FCC member to call and email the following Senators and tell them to vote no on SB 1684.**
