

FLORIDA HOUSE *of* REPRESENTATIVES

Today, Governor DeSantis signed into law the **Florida Legislature's Compact to Conserve**, our generational commitment to preserving Florida's natural beauty. This act honors the commitment and relationship the Seminole Tribe has to the land and its spirit of environmental consciousness.

We dedicate nearly 100% of the revenue from the Seminole gaming compact to further our mission to leave Florida better off than we found it. It represents a consistent and significant revenue stream toward the Wildlife Corridor, resiliency and water quality initiatives, and for the first time dedicates revenue for management of state conservation lands.

It would not have been possible without Senate President Passidomo's leadership and passion. Together, as presiding officers of the Florida Legislature, we presented the Governor with a vision and proposal allowing future generations of Floridians and visitors to enjoy Florida's natural treasures and resources. Thank you to Chair Leek, Chair Payne, and Representative Buchanan for your steadfast stewardship and support.

PAUL RENNER

SPEAKER, FLORIDA HOUSE OF REPRESENTATIVES
